LETTER TO PARENTS REGARDING REQUIRED DENTAL EXAMINATIONS

The Pennsylvania School Health Law requires dental examinations for students entering K, ELS, 3, and 7, as well as Educational Support classrooms. These grades were selected because they represent critical periods of growth and development.

These examinations can be done by your family dentist since he/she can best evaluate your child's dental health and assist you in receiving any necessary treatment. School dental health evaluations will be provided for students who do not furnish written proof of a recent private dental examination.

Please have the following form completed by your dentist and returned to school by the first week of school in **September**. **If this form is not returned, your child will be required to have a school dental health evaluation sometime during the coming school year.** No action is necessary if you want your child to have a school dental health evaluation.

DENTAL HYGIENE CLINIC – UNIVERSITY OF PITTSBURGH SCHOOL OF DENTAL MEDICINE:

Plaque, a sticky film of bacteria, is constantly forming on teeth and gumlines. Plaque can cause gum disease and tooth decay if it is not thoroughly cleaned off each day by thorough brushing and flossing. Professional cleanings (by a dental hygienist or dentist) are recommended every six months to remove any hardened plaque buildup and help maintain the health of gums and teeth. The Dental Hygiene Clinic charges only a small fee for cleanings. Medical Assistance is also accepted. Phone 412-648-8411 for a dental hygiene (cleaning) appointment.

EPSDT Program (EARLY PERIODIC SCREENING DIAGNOSIS AND TREATMENT) FOR ORTHODONTIC CARE:

Your child may qualify for dental treatment coverage (including orthodontic treatment) if your family has Access card coverage under the Medical Assistance Program through the EPSDT Program. For information, call 1-800-543-7633
